ABOUT ME

I hold a Bachelor's degree in Information Technology from the International Malaysian University in Yemen, along with several diplomas and courses in Information Technology and self-development. I work as an application developer specializing in both Frontend and Backend development, and I have experience in developing efficient systems and applications. I have successfully implemented numerous projects and systems that are still operational and achieving great success. I speak English at a good level, which enables me to communicate effectively in multicultural environments.

My goal is to enhance my managerial and strategic skills by pursuing a Master's degree in Business Administration. I aim to gain in-depth knowledge in management areas such as project management, leadership, and business analysis to apply them in the workplace and achieve successful organizational goals.
